SECTION 1 — HERO

HEADLINE

Build the Future. Define It.

TAGLINE / SUB-HEADLINE

BloomTech lives at the intersection of vision and execution. We deliver the high-performance infrastructure and AI-driven solutions your business needs to lead. From enterprise systems to secure cloud scaling, we don't just prepare you for the future — we build the technical foundation that ensures you define and dominate it today.

SECTION 2 — SERVICES GRID

SECTION LABEL

SECTION HEADLINE

End-to-End Technology Solutions

From bare-metal server design to AI-native applications — every layer of your technology stack, engineered for scale.

SERVICE CARDS (3-COLUMN GRID)

01

Custom Web & Mobile Development

Bespoke CRMs, ERPs, e-commerce powerhouses, and secure client portals built on clean, scalable architecture with zero bloat.

React / Next.js

Django / FastAPI

Node.js

02

Custom AI & Machine Learning

Agentic AI workflows, domain-specific RAG systems, and on-premise LLM deployments. Intelligence built for your data, not the public cloud.

Anthropic Claude

LangChain / CrewAI

GPT-4o / Llama 3

03

IT Network & Infrastructure Design

CompTIA Network+ certified architecture — SD-WAN, VLAN segmentation, next-gen firewalls, and enterprise Wi-Fi with zero dead zones.

Cisco / Ubiquiti

pfSense / Fortinet

Zero Trust

04

Custom Server Design & Deployment

Purpose-built AMD EPYC compute clusters, GPU AI nodes, and enterprise NAS/SAN storage — engineered with 72-hour burn-in testing.

AMD EPYC

Proxmox VE

Supermicro

05

Cloud Hosting & Application Deployment

Managed cloud infrastructure, CI/CD pipelines, Docker/Kubernetes containerization, and DDoS-hardened WAF deployments across AWS, Azure, and GCP.

AWS / Azure / GCP

Kubernetes

CI/CD Pipelines

06

Security & Data Protection

CISA-certified defense-in-depth — Zero Trust IAM, EDR/behavioral AI endpoint protection, immutable backups, and SOC2/HIPAA compliance alignment.

CrowdStrike /
SentinelOne

Okta / Entra ID

SIEM / Wazuh

07

Custom CRM & ERP

Lean, high-velocity CRM and ERP systems integrating inventory, HR, order processing, and supply chain logistics into one seamless dashboard.

Python / Django

PostgreSQL

QuickBooks /
Stripe

08

Online Marketing & SEO

Technical SEO, Core Web Vitals optimization, precision PPC, and AI-powered content strategy — engineered to dominate, not just rank.

Ahrefs / SEMRush

GA4 / GTM

Google Ads / Meta

09

Custom NAS Solutions

Enterprise NAS with 10G–100G throughput, ZFS/TrueNAS integrity, immutable snapshots, and encryption at rest — zero monthly subscription.

AMD EPYC

OpenZFS /
TrueNAS

Mellanox / Intel

10

Managed AV & Collaboration

Boardrooms to enterprise auditoriums — AV-over-IP, Crestron/AMX control, beamforming arrays, and broadcast-grade live event production.

MS Teams Rooms

Crestron / Extron

Biamp / Q-SYS

11

IT Asset Lifecycle Management

Strategic procurement, zero-touch provisioning, active maintenance, CISA-standard compliance auditing, and NIST-compliant secure destruction.

Snipe-IT

Microsoft Intune

ISACA / COBIT

12

Professional IT Consulting

Digital transformation, vCISO/vCTO fractional services, cloud readiness assessments, and IT governance aligned to COBIT, NIST, and ITIL frameworks.

CISA / ISACA

SOC2 / HIPAA

ISO 27001

SECTION LABEL

— CORE SOLUTIONS

SECTION HEADLINE

Three pillars. Total coverage.

AI & Intelligent Automation

Agentic workflows · RAG · On-premise LLMs · Data pipelines

We build production-grade AI that doesn't just chat — it executes. Agentic workflows, private LLM deployments, and autonomous multi-system orchestration.

- Custom RAG on your private data
- On-premise AI — zero cloud dependency
- Multi-agent orchestration via LangChain/CrewAI
- Document intelligence & automated pipelines
- CISA-certified security & full audit logging

Infrastructure & Hardware

Custom servers · NAS/SAN · Rack & Roll · Network design

Purpose-built AMD EPYC servers, enterprise NAS storage with ZFS integrity, precision rack & roll deployments, and SD-WAN network architecture.

- 72-hour burn-in testing on all builds
- 10GbE to 100GbE NAS throughput
- Proxmox / VMware virtualization clusters
- Structured cabling to Cat6a/Fiber standards
- Hot/cold aisle airflow optimization

Security & Compliance

CISA-certified · Zero Trust · SOC2 · Incident response

CISA-certified defense-in-depth that makes your infrastructure audit-ready from day one. Zero Trust architecture, immutable backups, and full compliance alignment.

- SOC2, HIPAA, PCI-DSS, ISO 27001 alignment
- Zero Trust IAM + phishing-resistant MFA
- Behavioral AI endpoint detection (EDR)
- Immutable, ransomware-proof backup design
- Quarterly security reviews & policy updates

SECTION 4 — WHY BLOOMTECH

SECTION LABEL

— WHY BLOOMTECH

SECTION HEADLINE

The standard is different here.

0
1

CISA-Certified at the Foundation

Every solution we build carries the discipline of an auditor — traceable, compliant, and defensible under regulatory scrutiny. Security isn't a feature we add; it's baked into the architecture from day one.

0
2

Business-First Engineering

We map your workflows before we write code. Our 4-stage Business-First process ensures the final product mirrors your team's natural processes — eliminating the "Excel-and-Email chaos" of off-the-shelf tools.

0
3

You Own Everything

Proprietary logic layer, your data, your IP. No fluctuating per-user licensing fees, no vendor lock-in. Custom builds mean the system grows with your ambition, not against it.

0
4

Full-Stack, End-to-End

From bare-metal rack design to AI-native applications to performance marketing — we cover every layer. One team, total accountability, zero integration gaps between your hardware and your software.

SECTION LABEL

— OUR TECHNOLOGY STACK

SECTION HEADLINE

Enterprise tools. Expert hands.

AI & Automation	Anthropic Claude · GPT-4o · Llama 3 · LangChain · CrewAI · AutoGen · Pinecone / Chroma
Cloud & Hosting	AWS · Microsoft Azure · Google Cloud · DigitalOcean · Vercel · Docker · Kubernetes
Backend / Dev	Python (Django/FastAPI) · Node.js · Go · PostgreSQL · MySQL · MongoDB
Frontend	React.js · Next.js · Tailwind CSS · Shopify Plus · WordPress (Headless) · Webflow
Infrastructure	AMD EPYC · Proxmox VE · VMware vSphere · Supermicro · Gigabyte Enterprise · TrueNAS / OpenZFS
Networking	Cisco Catalyst · Ubiquiti UniFi · Juniper · pfSense · Fortinet · Palo Alto
Security	CrowdStrike · SentinelOne · Okta / Entra ID · Wazuh / Splunk · Duo Security · TPM 2.0
Analytics & SEO	Google Analytics 4 · GTM · Ahrefs · SEMRush · Screaming Frog · Microsoft Clarity
AV & Collaboration	Microsoft Teams Rooms · Crestron / AMX · Biamp / Q-SYS · Shure / Sennheiser · Blackmagic Design

Don't prepare for the future. Define it.

The future isn't just "using AI" or "moving to the cloud" — it's embedding intelligence into the fabric of your business. Let's build the technical foundation that puts you ahead, permanently.
